User Registration, Login, and New Account:

User Story	Task
As a new user, I want to easily sign up for a PetPals account using my email and password, so that I can start sharing adorable pictures of my pets.	1. Create user registration form with email and password fields.
As a registered PetPals user, I want to log in quickly using my email and password, ensuring a secure and personalized experience for showcasing my pets.	2. Implement user login system with email and password authentication.
As a user, I want to see a "Forgot Password" option that allows me to reset my password by receiving a link via email, ensuring access to my account if I forget my credentials.	3. Develop the "Forgot Password" feature with email-based password reset.
As a user, I expect clear error messages if I enter incorrect login credentials or try to register with an existing email, ensuring a smooth onboarding process.	4. Display clear error messages for incorrect login credentials and duplicate email registrations.
As a registered PetPals user, I want the option to stay logged in, so that I don't have to enter my credentials every time I want to share pet moments.	5. Implement the "Stay Logged In" feature for registered users.
As a user, I want to be able to create a new account using my email address and a secure password so that I can access the website's features and services.	6. Modify the user registration system to align with any updates made to the admin tools.
As a user, I need the option to log in to my existing account using my registered email and password, ensuring a secure and personalized experience.	7. Ensure that any changes to the login system for admins are compatible with the user login process.
As a user, I want to receive a confirmation email after registering, containing a verification link to activate my account.	8. Confirm that the email confirmation system for users is in sync with any adjustments made for admin-related communications.
As a user, I want the option to reset my password if I forget it, by receiving a password reset link via email.	9. Verify that the password reset feature for users is aligned with any updates made to the admin tools.
As a user, I expect a smooth and intuitive login process with error messages displayed clearly if there are any issues with my credentials.	10. Implement a smooth and intuitive login process with clear error messages.

PetPals User Engagement:

User Story	Task
As a PetPals user, I want to engage with the vibrant PetPals community by sharing, exploring, and connecting through pet moments.	11. Develop features for users to easily share pictures and videos of their pets.
As a PetPals user, I want to easily share pictures and videos of my pets, including captions and hashtags, to engage with the PetPals community.	12. Implement features for users to explore and connect through pet moments.
As a pet enthusiast, I want to see a feed of pet posts from other users, allowing me to discover and connect with fellow pet lovers.	13. Implement a feed of pet posts for users to explore and connect.
As a PetPals user, I want the ability to edit or delete my posts, ensuring control over the content I share with the community.	14. Develop the functionality to edit or delete user posts.
As a user, I need the option to like, comment, and save posts from other users, fostering interaction and building connections within the PetPals community.	15. Implement features for users to like, comment, and save posts.
As a pet owner, I want to have a profile page showcasing my pets and a feed of my own posts, creating a personalized space within the PetPals platform.	16. Design a user profile page for pet owners with a feed of their posts.

Adding Own Pet Moments:

User Story	Task
As a pet owner, I want to be able to create a PetPals account for my pet, using relevant details and a profile picture, so that I can share their adorable moments.	17. Develop features for pet owners to create accounts for their pets.
As a user, I need the option to add multiple pets to my profile, each with its own dedicated space for sharing moments.	18. Allow users to add and manage multiple pets within their profiles.
As a pet owner, I want to easily upload pictures and videos of my pets, accompanied by captions and hashtags, to create engaging and memorable posts.	19. Implement functionality for users to upload media content for their pets.
As a user, I want the ability to organize my pet posts into categories or themes, allowing me to curate a personalized feed.	20. Develop a system for users to categorize and organize their pet posts.
As a pet enthusiast, I want to explore posts from various pet owners, liking, commenting, and sharing the joy of pet ownership within the PetPals community.	21. Implement features for users to explore and interact with posts from other pet owners.

Administrator Role for PetPals:

User Story	Task
As a PetPals admin, I need a secure login system with role-based access control, so that I can manage the backend functionalities of the PetPals platform.	22. Develop a secure login system with role-based access control for PetPals administrators.
As an admin, I want to be able to moderate and remove inappropriate content, ensuring a positive and safe environment for all PetPals users.	23. Implement content moderation tools for admins to review and remove inappropriate content.
As an admin, I need tools to manage and respond to user inquiries and support requests efficiently, maintaining a high level of customer satisfaction.	24. Create a support dashboard with tools for admins to manage and respond to user inquiries efficiently.
As an admin, I want to be able to customize the appearance of the PetPals platform, including banners and colors, to align with the brand and enhance user experience.	25. Develop customization features for admins to adjust banners, colors, and the overall platform appearance.
As an admin, I need to have analytics tools to track user engagement, popular pet trends, and overall platform performance.	26. Implement analytics tools for admins to track user engagement, pet trends, and platform performance.
As an admin, I want the ability to feature certain pet posts, creating a spotlight for exceptional and heartwarming pet content within the PetPals community.	27. Create a feature system for admins to highlight and feature specific pet posts on the platform.
As an admin, I need to be able to communicate with PetPals users about platform updates, events, and other important announcements.	28. Implement a communication system for admins to reach out to PetPals users.
As an admin, I want to be able to organize and categorize pet posts into different themes or challenges, encouraging users to participate in specific activities.	29. Develop a system for admins to organize and categorize pet posts into themes or challenges.
As an admin, I need to have tools to manage and update static pages, such as the PetPals homepage and community guidelines.	30. Create tools for admins to manage and update static pages, ensuring the accuracy of information on the PetPals platform.
As an admin, I want the ability to create and manage pet-themed events, contests, and campaigns to engage the PetPals community and attract new users.
